

Uncover Forensics **FORENSIC TRAINING**

PROFESSIONAL ETHICS IN FORENSIC SCIENCE

8-hour online, self-paced course

This course is designed to meet accreditation requirements for training in the application of ethical practices in forensic science. The training covers general ethics and morals and how that differs from professional ethics. Topics include what defines “good” ethics, considerations for professional ethics and scientific excellence in forensic science, how to establish and enforce a code of ethics, and runs through ethical scenarios that occur in day-to-day work as a forensic scientist. The training also explores real-world examples of bad professional ethics in forensic Science and considers what ethical violations occurred in each.
